Historic, Archive Document

Do not assume content reflects current scientific knowledge, policies, or practices.
LOCATION—We are located in northern New Jersey and our climate is such as to test the extreme hardiness of all the varieties we list.

STOCK—Periodically inspected by State and Federal Supervisors. A certificate of inspection accompanies each order.

TERMS—“Cash-with-Order”—Our prices include packing charges. Remittances may be made by check or Post Office Money Order.

DELIVERY—F.O.B. Nurseries, Bergenfield. If parcel post shipment is desired, add 10% to the total value of the order. On small parcels where plants are wanted in a hurry, a “Special Handling” stamp of 25c will speed up delivery. This is additional to the 10% for postage.
We do not solicit orders for less than $1.00.

CLAIMS FOR DAMAGE IN TRANSIT—All goods are shipped at purchaser’s risk after they are delivered to the forwarding company.
All other claims must be made direct to our office within five days of receipt of goods.

GENERAL CULTURAL DIRECTIONS
No. 1—Common garden soil—light and well drained.
No. 2—1/3 loam—1/3 sand and gravel—1/3 leaf mold—suits most rock plants.
No. 3—Bog Plants—moist situation—1/3 peat—1/3 leaf mold or decayed turf—3/1 good loam.
No. 4—Wood Plants—Acid loam—2/3 leaf mold (oak, beech conifers decayed leaves)—1/3 loam—Avoid lime.
No. 5—Alpines—Moraine culture—Dig pocket 1 1/2 ft. deep, fill 1 ft. with 1” or 1 1/2” broken stones—balance filled with 2/3 coarse gravel and 1/3 leaf mold and loam.

Letter “E” following cultural number means exposed to full Sun.
“L” following cultural number means 1/2 shade or morning Sun, or shelter from burning mid-day or afternoon Sun.
“S” following cultural number means shade—northern exposure.
“M” following cultural number means to be grown with other plants, so roots may run together—preferably plants of same height.

EXAMPLE—Linaria Hepaticaefolia No. 4 LM—Acid loam—semi shade, planted with Sedum Ternatum or any other dwarf plant requiring same exposure.

While these cultural directions are the results of observation made and believed to be best suited for the different Rock Plants, the man or woman willing to experiment will find many thrills, successes and failures in trying other means. We repeat again that these directions are general in their scope, and meant to suit general locations.
MAYFAIR NURSERIES

were established solely for the growing and propagating of Rock Plants and Alpines, in order to insure the American gardener a source of supply for these unusual and interesting little gems, also to give them the necessary help and advice pertinent to this subject.

Read this little catalog very carefully and attentively and you will find a solution for every problem that may present itself in the planting of the Rock Garden. Should you not find the information wanted, write to us in care of our Service Department, and we will endeavor to solve it to your satisfaction.

Neither is this all—if you do not know how to begin your Rock, Wall or Bog Garden, send us all the details—size, exposure, height, nature of soil, and we will send you a working and planting sketch designed so plainly that anyone can read it. This is furnished gratis with an order for plants.

ROCK GARDEN - WALL GARDEN - BOG GARDENS

We also specialize in these various forms of garden designing and planting. My staff is one of the most efficient maintained for this purpose. This is their only work, to design and build artistic and original Rock Gardens, Wall Gardens and Bog Gardens.

A life time guarantee on the construction work is given with every contract, and the plants are guaranteed for one year. Furthermore, I supervise all work from beginning to end. This is the best argument I can offer. I do stand behind my work at all times.

We have on our premises, a display Rock Garden, where all the little gems listed herein and a quantity of others are established and flourishing, and we always welcome visitors. We would appreciate, if visitors would give us the date of their coming in order to have a representative conduct them through the Rock Garden.

The Nurseries are closed on Sundays and Holidays.

Marcel LePiniec.

P.S.: All Photos used in the illustration of this catalog have been taken in our Rock Garden on our Premises.

NOVELTIES

New plants of recent introduction and real merit are printed in bold characters—these have been tried for hardiness, foliage and flowering qualities and will (we are certain) cause you great delight and pleasure. Note them by the asterisk (*) and the capital letters.

- IMPORTANT -

We cannot urge too strongly the necessity of ordering early. While all our plants are of the same quality and size, our stock on many varieties may run short and he who comes first, will be served first.

**ARABIS—Cruciferae—Continued**

ty foliage with spikes of white flowers rising from each rosette...

166 KELLERERII—A real choice Arabis—Grey foliage—dwarf—white.

168 Procurrens—Mat forming type, very dwarf with dark green shiny leaves placed in rosettes—white...

170 Rosea—A good kind to grow with Alpina—Pink flowers...

172 Stelleri—A new variety with rounded thick and slightly hairy leaves. Very neat—white...

*174 STURII—Similar to Procurrens, but with smaller foliage and smaller flowers—white.

**ARENARIA—Caryophyllaceae—Sandwort—Sandy soil—Sunny.**

176 Caespitosa—A moss like ground cover, studded with innumerable tiny white flowers—Fine for steps and stepping path...

178 Juniperina—A compact grower with tiny branches, resembling juniper foliage—white...

180 Montana—A plant that everyone should have—forms large mats of trailing deep green foliage, with large white flowers—fine on wall or over large rocks.

**ARETHUSA—Orchidaceae—Indian Pink—Bog.**

181 Bulbosa—A bulbous orchid and one of our rarest natives, almost extinct. Rather difficult to manage. Must be planted in the Bog Garden. Beautiful solitary crimson pink blossoms with crested yellow and white lip...

**ARMERIA—Plumbaginaceae—Sea thrift—Sandy soil—Sun.**

182 Alpina—Thrift of the Alps—tufty grower, sending long stems topped with a head of clear rose flowers..

* 184 CAESPITOSA—A gem amongst gems—neat, dwarf—Spring cushion crowned with soft rose heads of flowers—Do not spare grit...

186 Laucheana—A dwarf and improved form of Maritima, forming neat cushion of grass like leaves. Carmine flowers...

188 Maritima—Larger edition of Laucheana—pink flower heads...

190 Maritima alba—White form of above...

*192 SIX HILLS HYBRID—A new variety—cross of Caespitosa and Alpina—Dwarf and compact large rose pink flowers...

*194 VINDICTIVE—Another novelty—really an improved Laucheana—superb deep crimson—seldom out of bloom.

**ARTEMISIA—Compositae—Wormwoods—Ordinary soil.**

196 Abrotanum—The "old man” of old fashioned gardens—very aromatic and finely cut foliage—grey. To be trimmed from time to time to keep dwarf. White flowers...

* 198 FRIGIDA—The “Arctic Wormwood.” My name for it is Silver Cloud. No other description can put it better. A wonderful plant for any use. Aromatic—yellow flowers. Wants a dry spot. Fine on wall...

**ARRHENATHERUM—Gramineae—Ordinary soil.**

* 200 BULBOSUM VARIEGATUM—Dwarf form of ribbon grass, with white and green stripes.

**ASPERULA—Rubiaceae—Woodruff.**

202 Odorata—The sweet woodruff—emit a sweet hay fragrance when dried—a neat ground cover for shady places—White.

4L 6" 35c 3.00
ASTER—Compositae—Common soil.
204 Alpinus—Charming dwarf Spring blooming aster with clear lavender flowers set one to a stem—pro¬fuse bloomer.......................... 1 6" 35c $3.00

*206 MAUVE CUSHION—Mat forming type, rapid grower—large size mauve flowers in large numbers—one of the latest bloomers in the rock garden—October.... 1 6" 50c 4.25

AUBRIETIA—Cruciferae—False Wall Cress.
208 Deltoidea—A good plant for ground cover or to plant in wall—Early Spring bloomer. Violet colored flowers—trim after blooming.......................... 1 4" 35c 3.00

BELLIS—Compositae—Wild European Daisy—Common soil.
*210 ROTUNDIFOLIA COERULESCENS—A most dain¬ty rock plant—resembles the flowers you see in books. Too dainty to be real. Pale lavender blue with pale yellow center, blooms Spring, Summer and Fall—October 29th, and one of my plants has eight blooms on it. Plant in masses.......................... 1 4" 40c 3.50

BELLUM—Compositae—Common soil—gravely.
212 Minutum—A pigmy if any—the foliage 1" high—the blossoms sitting almost on it—Pink, turning white. Will form nice size tufts if slightly protected.. 1L 1" 50c

BRUCKENTHALIA—Ericaceae—Bushy Heather—peaty soil.
*214 SPICULIFOLIA—A compact little bush, upright dwarf, and evergreen—hardier than most heathers, with delightful heads of clear pink rose flowers ending each branch—a rare gem—grows well in sun or semi shade.......................... 4L 8" $1.00

CALAMINTHA—Labiatae—Calamint—Ordinary soil.
216 Alpina—Mat forming plant—aromatic foliage, blooms all along, light violet spikes of flowers............. 1 4" 35c 3.00

CAMPANULA—Campanulaceae—Bell flowers.
218 Abietina—A rare and delightful specie—Reddish purple bells on 9" stems—spreads quite rapidly..... 5LM 9" 75c
220 Caespitosa—A close simile of Pusilla—spreads faster—light blue tiny bells in profusion.................. 2LM 4" 75c
222 Carpatica—A good plant where space has to be filled—Blooms all Summer—Big blue upright bells in profusion.......................... 1" 6" 35c 3.00
224 Carpatica Alba—White form of the above............. 1 6" 35c 3.00
226 Fenestrella—Similar to Garganica with hairy leaves and paler flowers—star more open.................. 2L 3" 75c

*228 GARGANICA—In my opinion the most satisfactory of all the Alpine bell flowers. The plant is really a solid mass of clear lavender blue stars, opening day after day for over two weeks in June. Stands Sun, but flowers last longer in lightly shaded position...
230 Glomerata Acaulis—A very rare Bluebell of tufty habit—the flower cluster hardly rising above foliage. Covered with intense violet blue bells of large size... 2L 4" 75c
232 Macrorrhiza—A rare Bluebell, blooming very late—Fine Blue flowers—wants full sun and limy compost. 5E 4" 75c
234 Muralis Portenschlagiana—The true form, deep violet blue—dwarf, forming large mats once established—easy, very floriferous—Mrs. Wilder calls it “a real delight,” so do I.......................... 2L 3" 50c 4.25
236 Pulloides—A choice treasure, fast spreading and reliable—large purple bells on 3" stems.................. 2LM 4" 75c
238 Pusilla—Another little witch, creeps and blooms all over. Cut some flowers off if you care to keep it. Pale blue.......................... 2LM 2" 50c
240 Rotundifolia—The Blue Bells of Scotland—cheery and bright—fine in wall.......................... 1 12" 40c 3.50
242 Tomentosum—Some may think it a weed, but if you have an odd corner to fill, or room on your wall, by all means plant it. The foliage is silvery white and the flowers are white and delightfully fragrant. 1 4” 25c $2.25

CHERANTHUS—Cruciferae—Wall flower.
244 Allioni—Although a biennial, it will seed itself and repay you with beautiful fragrant orange red spikes of flowers. Fine for wall. 1 10” 35c $3.00

CHRYSANTHEMUM—Compositae.
246 Alpinum—A rare plant like a tiny trailing daisy. Roots in layer. White and yellow center. June. 2 3” $1.00
248 Articum—Another late bloomer—forming dense mats covered with big white daisies on 4” stems. October. 1 8” 50c $4.25

COREOPSIS—Compositae. Ordinary soil.
250 Rosea—I call it “Rock Garden Cosmos.” It is dwarf and pretty and will bloom in Sept. and Oct. Soft pink 1L 10” 35c $3.00
251 Canadensis—A Dwarf creeping dogwood—will do well along brook or spring. 4 4” 50c $4.25

CORYDALIS—Papaveraceae—Fumitory—Leaf mold and loam.
252 Glauc—a biennial that never leaves your garden. Neat and ferny, bluish foliage with small pretty yellow and red or pink flowers all Spring and Summer long. Plant near large rocks or boulders for effect. 1-4 10” 35c $3.00
254 Lutea—If you have a shady corner to brighten up, plant it. It blooms all Summer long, till Frost. Graceful and neat ferny foliage—yellow flowers. Fine for shady wall. 4L 8” 50c $4.25
256 Cheilanthifolius—A new species and one of the best with pretty fern-like fronds and clear yellow flowers. 4L 12” 50c $4.25

CYPRI PEDIUM—Orchidaceae—Moist wood loam—Lady’s Slippers.
258 Acaule—The pink Lady’s Slipper—Large pink orchid speckled with crimson. 4SM 6” 35c $3.00
260 Pubescens—A beautiful native orchid with yellow flowers. 4SM 6” 35c $3.00
262 Spectabile—The Queen’s Slippers. Well named indeed, with its white and clear rose blossoms—will do well in bogs. 4SM 12” 50c $4.25

DAPHNE—Thymelaceae—Garland Flower.
264 Cneorum—Evergreen little shrub, invaluable in all Rock Gardens. Always neat. Has small dark green leaves and clusters of rose red flowers in Spring and Fall—Very fragrant. Wants acid loam and half shade Specimen Clumps, 12 to 15” Spread. 4L 12” $1.00 B & B $2.50

DELPHINIUM—Ranunculaceae—Larkspur—Ordinary soil.
266 Chinensis—Dwarf form of border perennial. Lovely—comes in various shades of blue. 1E 18” 40c $3.50
268 Nudicaule—Red scarlet kind, dwarf also. Wants plenty sun and a dry spot. Beautiful in wall. 1E 18” 50c $4.25

DIANTHUS—Caryophyllaceae—Pinks.
270 ALPINUS—A lovely little Alpine pink with dark glossy leaves and large carmine spotted crimson flowers—give it leaf mold, grit and half shade, and it will grow and stay with you. 5LM 3” 60c $5.00
272 Acaulis—Another Alpine pink. Dwarf and lovely soft rose. 1E 3” 60c
274 Arenarius—If you want a solid mat of low greyish green foliage covered with fragrant fringy blossoms, this is the plant. 1E 6” 35c $3.00
276 Arvenensis—A very dwarf form of Cheddar Pink. Compact and choice—pretty in wall ........................................... 1E 4’’ 50c $4.25

*278 BREVICAULUS—The Cushion Pink forms a round compact mat of bluish grey leaves studded with fine pink blossoms .................................................. 1E 3’’ 50c 4.25

280 Caesius—The Cheddar Pink—a good rock plant, fragrant and very prolific—grey foliage ......................................... 1E 6’’ 50c 4.25

281 Caesius Flora-Plera—Double flowering form of the above .................................................................................. 1E 3’’ 50c 4.25

282 Caucasicus—A prostrate dwarf pink, creeping, deep rose .................................................................................... 1E 4’’ 40c 3.50

284 Deltoides—The old-fashioned Maiden Pink—good ground cover and very floriferous ............................................. 1E 6’’ 30c 2.50

286 Deltoides Alpinus—One of our seedlings—a wonderful hybrid with large intense Carmine flowers, speckled with crimson. Blooms continuously—stock limited .............................................................................. 2 2’’ 60c

288 Freynii—A dwarf hybrid, likes leaf mold and semi-shade—large Carmine flowers ...................................................... 2L 2’’ 75c

290 Griesbachii—A dwarf grey leaved trailer with deep rose flowers in profusion ............................................................ 1E 3’’ 50c 4.25

*292 NEGLECTUS—This pink has probably come from the Gardens of the Gods—It has all the qualities a pink should have and more—Very dwarf. The flowers are a brilliant cherry-salmon, the reverse is buff—tiny grass like leaves—wants plenty of grit .......................................................... 1 4’’ 75c 6.25

*294 NEGLECTUS BARBATUS—A new hybrid raised by us—stronger and easier than Neglectus, also more floriferous. The flowers bunched four and more to each stalk, covering the foliage entirely. Same color as Neglectus ........................................................................................................ 1E 1’’ 75c 5.25

296 Pritchardi—A little tiny mite—friendly and easy. Will do well in path or steps in full Sun. Bright crimson .......................... 1E 1’’ 75c 5.25

298 Segueri—Begins blooming in September, erect grower and very floriferous. Bright pink ..................................................... 1E 10’’ 50c 4.25

300 Superbus—Forms large sized mats of prostrate foliage, compact and always neat. Fragrant and laciniate large lilac flowers on 6’’ stems ........................................................................................................... 1E 8’’ 35c 3.00

DICENTRA—Papaveraceae—Woodloam—Bleeding Heart.

302 Eximea—The everblooming Bleeding Heart—Bluish grey ferny foliage—Dainty Carmine pink blossoms .......................... 4L 15’’ 35c 3.00

304 Formosa—The Western Bleeding Heart—Similar to the above, the foliage is not as fringed, and flowers are paler ................................................................. 4L 12’’ 35c 3.00

306 Spectabile—The old-fashioned Bleeding Heart; the best of all ................................................................................... 1L 24’’ 60c 5.00

DRABA—Cruciferae—Whitlow Grass—Fine in walls.

308 Bruneifolia—A mossy Alpine, compact and lovely— one of the earliest Spring bloomers—yellow .............................. 1 3’’ 75c 6.25

310 Aizoides—A very neat Alpine, forming dense tufts of hairy rosettes and completely covered in April with yellow blossoms .............................................................................................. 1E 4’’ 75c

312 Fladnizensis—Delightful ground cover similar to the above—rosettes smaller—not so hairy, spreads faster—white ........................ 1 4’’ 50c 4.25

314 Hirta—Different than the above, the leaves are longer and form rosettes, sitting on the ground, sending up a small stem crowned with white flowers .............................................................................. 1 4’’ 50c 4.25

*316 REPENS—A charming dwarf carpeter, with masses of yellow flowers. Blooms right along. Fine for paths. ............................. 1 3’’ 50c 4.25

318 Rupestris—Somewhat like Hirta, but a trifle larger— White ................................................................................................. 1 4’’ 35c 3.00

DRYAS—Rosaceae—Mountain Avens.

320 Sundermanii—Resembles a dwarf creeping oak—
DRYAS—Rosaceae—Continued
charming and interesting—creamy white flowers—
fluffy seed heads—Gritty soil.

EPIGEA—Ericaceae—May-flower—Wood loam.
322 Repens—The trailing Arbutus—Evergreen creeper
with beautiful rosyl pink flowers in May—fragrant.
Strong Plants.

EPILOBIUM—Onagraceae—Willow Herb. Wood loam.
324 Nummulariifolium—A tiny creeper with tiny round
copper leaves and tiny white flowers. Wants a semi-
shaded spot. Fine for paths.

ERICA—Ericaceae—The Heathers—Peaty wood loam.
326 Carnea—Nodding red flowers along the stems, lovely
foliage.
328 Stricta—Corsican Heather, choice pink flowers, love¬
ly green.
330 Tetralix—A very compact, silvery gray variety, choice.
332 Vulgaris—The Scotch Heather, fine rose colored flow¬
ers, good.
332 Vulgaris Aurea—Golden form of the above.
334 Mediterranean Hybrida—A very choice Heather
from Southern France. Hardy and very early bloom¬
er—March, April. Carmine.
336 Pygmea—A pigmy Scotch Heather—free bloomer and
hardy. Very prostrate and compact—carmine.

*338 VULGARIS NANA—The cushion Heather. A moss
like plant, deep green, firm and compact. Roots as it
creeps. An excellent and exquisite rock plant. Rosy
pink blossoms—June. Large Plants $2.00.

ERINUS—Cruciferae—Fine for Walls.
340 Alpinus—Charming and easy rock plant of neat habit
—Seeds itself. Comes in white, pink or lilac.

ERYSIMUM—Crucifereae—Alpine Mustard—Walls.
342 Pulchellum—Tufty and neat mat forming Rock
Plant, covered with yellow flowers.
344 Pumilum—Similar to the above, but dwarfer and
more compact.

EUONYMUS—Celastrinae—Ordinary soil.
346 Radicans Kwensis—A charming and delightful
little shrub. Creeps and drapes itself over rocks. A
useful plant, does well in Sun or shade. Evergreen.

ERPETION—Violaceae—Australian Ivy Violet.
348 Reniforme—Rather tender plant, but really worth
the trouble to cover it in Winter. Compact tufts of
small kidney shaped leaves and numerous blue and
white little violets.

FERNS—Polypodiceae—Wood loam.
350 Adiantum Pedatum—The Maiden Hair Fern. One
of our most exquisite and graceful ferns.
352 Asplenium Ebeneum—The Ebony Spleenwort. A
true rock fern, slender and dwarf.
354 Asplenium Trichomanes—Maiden Hair Spleen-
wort. A dainty little fern growing in crevices of
shady rock.

*356 CAMPTOSORUS RHIZOPHYLLUS—The Walking
Fern. A rare fern, hardy and evergreen. The leavesoot at the tips and form new plants, whence the
name.

*358 PELLEA ATROPURPUREA—Cliffbrake—Another
true rock fern—thrives on limestone rocks and re¬
quires very little soil, leaf mold and sand.

GAULTHERIA—Ericaceae—Creeping Wintergreen—
Wood loam.
360 Procumbens—Woodloam soil—The Partridge Berry.
Will thrive in Sun or shade.

</table>
GENISTA—Leguminosae—Broom—Sandy loam.
362 Pilosa—A dense low growing tiny shrub for hot dry sunny places—masses of yellow flowers in July.
364 Sagittalis—A very interesting species, peculiar winged stems, prostrate—yellow.

GENTIANA—Gentianaceae—The Gentians.
*366 ACAULIS—The stemless Gentian—one of the most beautiful Alpines—Evergreen Glaucous foliage and large intense blue flowers. Our stock comes from a world famed grower. Prefers a heavy loam, rich and sunny. Stock limited.
368 Andrewsii—The Bottle Gentian—interesting, native, hardy and easy. The flowers are of a beautiful blue and never open. Sept.
371 Gentiana Puberula—A beautiful native of similar habit to Andrewsii, but the flowers are open, and of a pretty purple blue color. Likes moisture and acid soil.
372 SEPTEMFIDA—A most reliable kind, prostrate and a sure bloomer—large sky blue flowers—July and August.
374 Walujewi—A large growing kind with blue and white flowers.

GERANIUM—Geraniceae—Crane’s Bill—Ordinary soil.
376 Ibericum—A beautiful kind—lilac blue flowers in profusion. Fine amongst large rocks.
378 Sanguineum—A prostrate shrubby kind, with very neat foliage, forming mats and a steady bloomer. Red.
380 Sanguineum Album—White flowered species of the above.

GEUM—Rosaceae—The Avens—Ordinary soil.
382 Sanguineum Lancastriense—a very rare form of Sanguineum, with pink flowers veined with red—dwarf and compact.

GLOBULARIA—Selaginaceae—Common soil.
384 Heldreichii—Beautiful plant—velvety tufts of leaves, with beautiful orange red flowers. 1” across. The hardiest of all the Geums.

GYPSOPHILA—Caryophyllaceae—Dwarf Baby’s Breath.
390 CERASTOIDES—An exquisite little gem with red veined white flowers. Choice of the genus.
394 Repens Rosea—Pink flowered kind of the above.
396 Sundermanii—Similar to Repens Rosea—blooms more profusely.

398 Croceum—Fine yellow flowers.
400 Macranthum—Fine, creamy white—large flowers.
401 Tuberaria—Different from the rest. Has a basal tuft of leaves and sends up yellow flowers on erect stems.
HEPATICA—Ranunculaceae—Wood Anemone—Wood loam.

404 Acutiloba—Pointed leaved Hepatica. A beautiful native with blue flowers.................................
406 Triloba—Our Wood Liverwort. Similar to the above but rounded leaves. Blue—pale blue and white....

HERNARIJA—Illecebraceae—Ordinary soil.
408 Glabra—Very dwarf ground cover—good plant in stepping stones or wall................................

HEUCHERA—Saxifragaceae—The Alum Root—Ordinary soil.
410 Sanguinea Splendens—A “very Rock plant,” as one of my Japanese friends call it, perhaps he meant to add “important”—If your Rock Garden is more than ten square feet, you plant it at the foot of a large rock and tell me after blooming how you like it. Coral rose bells on 12" stem in profusion..............
412 Coerula—A little tiny mite you always will cherish. Covers itself for two months with porcelain blue flowers. It grows well in my wall but prefers slightly moist soil............................
414 Serpyllifolia—Same as above but creeps about.

HYPERICUM—Hypericaceae—St. John’s Wort—Common soil.
416 Coris—The rarest and best of the race—fine yellow flowers.................................
418 Fragile—A prostrate species equally choice—has yellow flowers also, and blooms all Summer.......... 1 4" 60c 5.00
420 Gracile—Another choice kind with very fine arching stems, pale green leaves and yellow blossoms.... 1 4" 60c 5.00
422 Polyphyllum—Forms solid mats of bluish grey foliage, and blossoms profusely all Summer—yellow...
424 Repens—A dwarf grower, quickly carpeting the ground—choice—yellow............................... 1 4" 60c 5.00

IBERIS—Cruciferae—Candytuft—Ordinary soil.
426 Jordani—A refined candytuft, always neat................. 1E 8" 50c 4.25
428 Pruiri—Another good form with large white flowers.. 1E 4" 50c 4.25
430 Sempervirens—The old-fashioned hardy candytuft—Evergreen and profuse bloomer. White. Trim after blooming........................................ 1 12" 30c 2.50
*432 SEMPERVIRENS “LITTLE GEM”—Cannot add much more to its description—Solid, compact, dwarf and exceedingly profuse—white........................... 1 6" 40c 3.50
*434 TENOREANA—A recently introduced species of high value—dwarf and semi-prostrate with a profusion of flowers, turning from white to pink lavender. All the above grow well in Walls.

IRIS—Iridaceae—Common soil.
*436 ARENARIA—The Sand Iris—a dwarf golden treasure—easy and choice................................. 1 4" $2.00
438 Cristata—A creeping kind with beautiful flowers porcelain blue and yellow—Prefers leaf mold—Sun or semi-shade......................... 4 4" 30c 2.50
440 Gracilipes—To quote Mrs. Wilder, “the most precious of all the dwarfs for the Rock Garden.” Another gem from the Garden of the Gods—Beautiful fragile. Blue flowers veined lilac................................. 4L 8" $2.00 5.00
Hexagona—A rare native with Bright Blue flowers almost stalkless appearing in late June......................... 4 12" 50c 4.25
*442 LACUSTRIS—A dwarf Cristata, rare and choice.... 4L 4" $1.00
444 Pumila—The true Crimean Iris—similar in all its forms to the common flag, dwarf foliage and large flowers in different shades of blue.................................. 1 6" 35c 3.00
12

MAYFAIR NURSERIES

448 Tectorum—The roof Iris of Japan—a beautiful Iris with large Dresden Blue flowers. The falls are crinkled along the edges.

450 Tectorum album—The rare white form of the above—Both look pretty on wall.

452 Verna—One of our choicest native beautiful pointy falls of a deep violet blue, and gold and yellow marking—fragrant. Dark evergreen foliage.

Hartweggi—A very dwarf native, with narrow leaves and dainty yellow or blue flowers.

Tenax—Another dwarf native, very graceful. Comes in different shades. Likes moist soil, although not necessary.

Bracteata—A golden beauty, and one of the prettiest American Natives.

Purdyii—Another dwarf handsome species—large pale yellow veined purple.

Chrysophilla—A delightful rock plant—delicate looking but very hardy. Pale yellow.

These five species are Western Irises, and should be planted in Fall. The plants we are offering were propagated in our Nurseries, and are acclimated, so do not compare them with the collected stock which does not, if ever, transplant satisfactorily. Place your order in Spring, as our stock is rather limited.

JASIONE—Campanulaceae—Sheep's Scabious.

454 Perenis—A dainty plant with scabious like heads of blue flowers.

LEPTINELLA—Compositae—Common soil.

455 Squarrosa—A new introduction. A beautiful finely cover, compact with beautiful finely cut leaves tinted bronze. Suited for path or walls.

LEONTOPODIUM—Compositae—Edelweiss—Common or chalky soil.

456 Alpinum—Give it plenty of crushed limestone, a little soil and full sun and it will grow like a weed, or grow it in your wall.

LEWISIA—Portulacaceae—Bitter Root—Common soil.

458 Rediviva—Forms a rosette of leathery, narrow, deep green leaves, sending forth 4 or 5 soft pink flowers at the end of a short stem.

LIBERTIA—Iridaceae—Peaty soil.

460 Formosa—A new rock plant forming tufts of grass like leaves with long spikes of large pure white flowers—beautiful.

LINARIA—Scrophulariaceae—Toad Flax—Common soil.

*462 AEQUITRIOBA—One of the most minute Rock Plants, forming a flat ground cover, and studded with beautiful lavender flowers in profusion—Steady bloomer—Paths and Walls.

464 Cymbalaria—The Kenilworth Ivy of the Old-Fashioned Garden. A very small creeper with white and blue flowers—tender, but seeds itself. Grows well indoors. Wall.

*466 HEPATICAEFOLIA—A neat and pretty ground cover, with light blue flowers—Suitable for path.

468 Origanifolia—A new introduction of great merit forms rounded little bushes 6", completely covered with beautiful lavender flowers—Blooms steadily...

470 Pilosa—Good ground cover or wall plant, has beautiful furry foliage and large pale helio flowers.

LINNEA—Caprifoliaceae—Twinflower—Woodloam.

*471 BOREALIS AMERICANA—Another little native

PARDANTHUS—Iridaceae—Blackberry Lily—Common soil.
514 Sinensis—Orange flowers spotted red in Aug.-Sept.
PARDANTHUS—Pridaceae—Continued
Open seed pods resembles Blackberry—Fine around pools..........................

PENTSTEMON—Scrophulariaceae—Ordinary soil.
516 Alpinus—Azure blue flowers. A good and choice rock plant
518 Caespitosus—A very dwarf creeper with evergreen foliage and lilac flowers.
520 Davidsonii—American Alpine, dwarf and shrubby with light purple flowers.
522 Heterophyllum—According to Mr. Correvon, this is the best of the Rock Pentstemons. Violet blue with pale blue throat.
524 Pubescens Pygmeus—A pretty rock plant with blue and white flowers. Very choice.
526 RATTANI MINOR—Another very dwarf species with beautiful sky blue flowers. Very fragrant—makes clumps in short time.
528 RUPICOLA—In my opinion this is the best of the Alpine penstemons. Dwarf, prostrate, bushy trailer with large rose-pink, red or light purple flowers. Does well in wall. In fact all the Pentstemon will thrive there.

PHLOX—Polemoniaceae—Beautiful on top of walls.
532 Divaricata—The early blue phlox. Forms great masses of clear lavender blue flowers.
534 Divaricata Alba—The white form of the above. Somewhat dwarfer.
536 Divaricata Laphamii—A finer form of Divaricata.
538 Ovata Carolina—A brilliant bloomer, giving a lively touch of color in the Rock Garden, either in half shade or sun.
540 Pilosa Splendens—Large flat heads of lilac rose flowers—graceful.
542 Reptans—A fine ground cover, forming neat rosettes of leaves and pretty vivid pink flowers.
544 " Alba—white
546 " Rosea—Pink and dark eye
548 " Lilacina—Lilac
550 " Atroliacina—Deep lilac
552 " G. F. Wilsoni—Soft lavender (true)
554 " VIVID—The brightest and most dazzling of the gems. Splendid type. Slower in growth than others

Subulata—The Mountain Pink, forming great big sheets of color early in Spring.
555 " Alba—white
556 " Rosea—Pink and dark eye
558 " Lilacina—Lilac
559 " Atroliacina—Deep lilac
560 " G. F. Wilsoni—Soft lavender (true)
561 " VIVID—The brightest and most dazzling of the gems. Splendid type. Slower in growth than others

PHYTEUMA—Campanulaceae—Gritty soil.
556 Hemisphericum—Forms tufts of deep blue flowers. Choice
558 Scheuizeri—Similar to the above but taller
560 Wagneri—A dwarf and compact kind with the typical round blue heads of the family

PLUMBAGO—Plumbaginaceae—Leadwort—Common soil.
562 Larpentae—A valuable plant for color effect in October when blues are rare. Profuse and choice
564 Reptans—Dwarf bushy plant, with showy blue flowers. Fine
566 Richardsoni—Beautiful blue flowers, best of the species—tall

POTENTILLA—Rosaceae—The Cinquefoils—Sandy soil.

*568 AUREA—A dwarf little plant with palmate leaves and yellow flowers.......

570 Cinerea—Very dwarf and compact grower. Large yellow flowers.

572 Miss Willmott—A charming species, with pretty foliage and beautiful strawberry red flowers....

574 TONGUEI—Trailing habit—dwarf, with deep rich yellow flowers with a crimson center. Very unusual. Rare. Fine in wall.

576 Tridentata—Evergreen shrubby species barely 6” high with very deep green shiny leaves—White flowers—will stand shade or sun.

578 Verna Nana—“One of the vivid enjoyments of the Rock Garden,” says Mrs. Wilder of it. Pure gold flowers in profusion. Dwarf and compact.

PRIMULA—Primulaceae—Primroses.

580 Auricula—Smooth, fleshy, light green leaves in rosettes—will thrive most anywhere. Prefers light shade. Flowers in various shades from yellow to claret.

582 Bessiana—A pretty bog primrose with velvety purple flowers in whorls.

584 Bulleyana—A Chinese bog primrose, similar to Bessiana. Flowers orange yellow.

586 Cashmeriana—A really beautiful kind, with pale to deep lilac flowers in solid round heads. Early.

588 Cortusoides—Very pretty and delicate looking primrose, with its soft crinkly leaves and bunches of deep rose flowers on thin stems.

590 Farinosa—A little fairy amongst the primroses. The underside of leaves is covered with sulphury white powder and the pink lilac flowers are borne in bunches on frail stems. Blooms Spring and Fall.

592 Japonica—An effective and striking looking plant, with flowers placed in tiers on long stalks. Colors from white to dark red. Does well in full Sun with moisture at roots.

*596 VERIS QUEEN OF HEAVEN—A true sky-blue Primrose.

598 Polyantha—The Bunch Primrose—Very easy and beautiful.

PRUNELLA—Labiatae—Self-Heal.

600 Incisa—A compact creeper, with pretty spikes of light purple flowers.

PULMONARIA—Boraginaceae—Lung Wort.

AUGUSTIFOLIA AZUREA—Vivid Gentian blue flowers in very early Spring. Dark green foliage.

PYRETHRUM—Compositae—Common soil.

602 Tchiatchewi—A pretty plant with a funny name, it’s the turfing Daisy, forming a fine ground cover, where nothing else would grow in full Sun. White daisies—fine in wall or paths.

PYXIDANTHERA—Diapensiaceae—Flowering Pyxie. Acid Sandy soil.

*603 BARBULATA—One of the most charming shrubs, if one may call it a shrub, barely ½” high, the branchlets thickly set with awl shaped leaves, the flowers entirely covering this bewitching little fairy with a pinkish white frock at the advent of Spring. I believe I am the only Nurseryman listing this rare plant. Strong clumps (small plants 75c).

SALIX—Salinaceae—Alpine Willow.

604 UVA URSIS—A tiny willow from the snow line—
SALIX—Salicaceae—Continued
trailing and prostrate—shiny green foliage. Interesting and rare.

SANGUNARIA—Papaveraceae—Blood Root.
606 Canadensis—One of our most beautiful natives.
Must be planted in masses for effect.

SANTOLINA—Compositae—The Lavender Cotton.
608 Chamaecyparissus Incana—One of the most effective plants in the Rock Garden or wall. Beautiful foliage, silvery white, compact and always neat—aromatic.

SAPONARIA—Caryophyllaceae—Soap Wort—Common soil.
610 Ocymoides—A beautiful, useful trailer for a hot exposure—pretty pink flowers in great profusion, blooms a long time.
1E 4" 30c 2.50

SAXIFRAGA—Saxifragaceae—The Rockfoils—Mixed soils. One of the choicest and most interesting gems for the Rock Garden.

Encrusted species—Hard leathery leaves, with lime encrustations on the edges, forming rosettes lying flat on the ground—they all want very gritty soil with some lime rubbish mixed with it. The height given is for the flower spike or head.

614 Aizoon—An easy growing kind with white flowers...
614 AIZOON ROSEA—Deep pink form of the above, faster spreader.
618 Aizoon Baldensis—The smallest of our collection. A real gem, rosettes no bigger than a small pea. Compact.
*626 COCHLEARIS MINOR—One of the choicest of the dwarfs. White.
628 Cotyledon x Aizoon—A larger growing form of Aizoon, with fat rosettes. White.
630 Crustata—Eranthis very prominent, silvery appearance—white.
632 Densa—Very compact grower, little larger than Baldensis—very choice.
634 Hostii—A rare species with beautiful rosettes of narrow flat leaves.
636 Engleri—Bluish green rosettes of long leaves—choice, white.
*638 KOLENATIANA MAJOR—Similar to Cartilaginea, but shorter leaves, turning red in Winter. Beautiful sprays of coral pink.
642 Lantoscana Superba—A rare form of Lingulata, with pale rosettes of small flat leaves—White.
644 Lingulata—Lovely blue grey rosettes—silvery edges and beautiful spray of white flowers.
*646 MacNABIANA—A kind that everyone will grow without trouble. Beautiful rosettes of medium size, heavily encrusted. Arching spikes of splendid white flowers spotted crimson.
648 Notata—A charming form of Aizoon—white.

650 **Paradoxa**—Deep blue green rosettes of long narrow leaves, heavy encrustations—singularly beautiful...

652 **Pectinata**—Long pale grey green leaves in stiff rosettes—white

*654 **PYRAMIDALIS**—The most showy of all the Saxifrages. Large pale green rosettes and enormous flower spikes of white flowers, speckled red. Very handsome.

656 **Rex**.—Small flat compact rosettes of evenly spaced leaves, short and pointy. A real choice kind; unusual

### CUSHION SECTION

658 **Apiculata**—Deep green pointed mats of leaves—pale early—pale yellow

*660 **BURSERIANA**—Dense grey spiny cushions, very early. White

662 **Elisabethae**—Similar to Apiculata, leaves more pointed. Yellow

664 **Ferdinand Coburgi**—A compact form of Elisabethae—Deep yellow

666 **L. G. Godseff**—A free growing cushion kind, with pale yellow flowers. Greyish foliage

### MOSSY SECTION

These prefer a semi-shaded situation and do not want lime—top dress after blooming—Divide every second or third year. Bloom as profusely as the “moss Pink” (Phlox Subulata).

*668 **BATHONIENSIS**—One of the best red and fastest growers of the Mossies. Blooms in profusion

670 **Caespitosa**—Will thrive in damp places, finely cut leaves—White and pink

*672 **CERATOPHYLLA**—The Stag’s Horn Saxifraga. A reliable mossy, will stand more Sun and exposure than any; clear white flower and deep green foliage.

674 **Decipiens**—White

676 **Decipiens Rosea**—Pink Hybrid

*678 **GUILFORD’S SEEDLING**—Bright crimson. An old standby

680 **H. S. Stokes**—A beautiful hybrid with bright carmine flowers

*682 **SANGUINEA SUPERBA**—Dark green foliage, and very fine deep crimson red flowers in solid sheets

684 **Wallacei**—A Scotch Hybrid of great value. At the head of the Whites. Large cup shaped flowers

Various other species—

686 **Crassifolia**—Large dark green leathery leaves, and beautiful spikes of rosy pink flowers

688 **Mertensiana**—A Rocky Mountain species, white and crimson

690 **Michauxi**—A charming species from the Alleghanies. White with red spots. Silky foliage and flower stems turning bronze in Fall

692 **Tolmiei**—A little gem from the Glaciers of the North West. Fall delivery

694 **Umbrosa**—The London Pride—Fleshy rosettes of dark green, and clouds of pink and white blossoms

696 **Sarmentosa**—A beautiful creeping kind, with hairy variegated leaves and rose flowers. Contrary to all beliefs, it is hardy, wants moisture and slightly acid soil. Large Plants.

**698 Virginiensis**—A charming native, with leathery dent¬
ed leaves, sometimes copper colored, and beautiful
sprays of white flowers. Will grow like a weed on a
damp rock........................................... 4L 6" 40c $3.50

**SCUTELLARIA**—Labiatae—Scull cap—Ordinary soil.

**700 Alpina nana**—A dwarf form of Alpina—more comp¬
act and very floriferous. Purple and yellow........ 1M 6" 60c 5.00

**SEDUM**—Crassulaceae—Stonecrops—Mixed soils.

**702 Acre**—If you like yellow in Midsummer and a dwarf
evergreen mat, order this .......................... 1E 4" 25c 2.25

**704 Album**—A thick compact grower with good clear
white flowers in profusion—fine in or on walls..... 1 4" 35c 3.00

**706 ANGLICUM**—Neat growing kind—gray leaves and
rose flowers. True.................................... 1 3" 35c 3.00

**708 DASYPHYLLUM**—One of the choicest of the Sed¬
ums—cushion of grey blue little beads with soft rose
flowers ................................................... 1EM 3" 50c 4.25

**710 Ewersi**—Gray blue trailer with compact rosettes,
terminating stems..................................... 1E 6" 40c 3.25

**712 LYDIUM**—A companion to Dasyphyllum, Anglicum,
and Nevii—blue gray with reddish stems........... 1 3" 50c 4.25

**714 MIDDENDORFIANUM**—A very choice kind, form¬
ing neat little bushes of pretty dented leaves of
bronzy green hue...................................... 1 6" 50c 4.25

**716 PRUNIATUM FOSTERIANUM**—Looks like a dwarf
creeping evergreen of bluish grey foliage, turning
brownish red in Fall...................................... 1 6" 50c 4.25

**718 PURDYII**—A very curious kind, closely allied to
Ternatum, forming one large size rosette from which
other little rosettes are borne at the end of red
thread-like stems. Our plants are propagated in our
Nursery and are acclimated.............................. 4L 2" 50c 4.25

**720 NEVII**—You’ll never take it for a Sedum. A compact
mass of the neatest greyish green tiny rosettes. A
real acquisition........................................ 1 2" 50c 4.25

**722 Rupestrae**—An easy growing variety—spiny foliage
and yellow flowers.................................... 1E 6" 35c 3.00

**724 Sarmentosum**—Some call it a gem, others a pest.
If you have plenty of space for an emerald carpet in
full Sun, it is good, but otherwise keep your eye on it
........................................................................ 1E 4" 25c 2.25

**726 Sexangulare**—Similar to Acre—neater.............. 1E 4" 35c 3.00

**728 Sieboldi**—An aristocrat—forms a beautiful fan shaped
spray of stems covered with opposite blue grey
leaves edged with pink, terminated in October with
brilliant pink flowers.................................. 1E 6" 50c 4.25

**730 SIEBOLDI VARIEGATA**—Same habit and growth
as the above, but leaves are striped white. Rare.... 1E 6" $1.00

**732 Spectable Brilliant**—A tall growing kind valuable
for its Carmine mass of crimson flower heads in early
Fall............................................................. 1E 12" 35c 3.00

**734 Ternatum**—The Spring Stonecrop of Virginia. A neat
growing species to place among your bird-foot Vio¬
lets, Hepaticas and Sanguinarias...................... 4M 3" 35c 3.00

**SEMPERVIVUM**—Crassulaceae—Houseleek—Dry sandy
soils.

**736 Arachnoideum**—The Cobweb Houseleek .......... 1E 6" 25c 2.25

**738 Calcareum**—A neat kind with sharp brown tips..... 1E 6" 25c 2.25

**740 Globiferum**—As the name implies, resembles little
scaly globules............................................ 1E 6" 25c 2.25

**742 RUBIGUNDUM**—A beautiful species—large rosettes
with pink shading at the base of leaves................ 1E 6" 50c 4.25

**744 Tectorum**—The Roof Houseleek. An old reliable... 1E 6" 25c 2.25
*746 TRISTE—A rare kind with dark red or brown rosettes in Spring.
We have in supplement to the above, a number of varieties which we do not want to list, as we are not satisfied as to their proper classification. They are all priced at 25c a piece.

SHORTIA—Diaspendifaeae—Oconee Bells—Wood loam.

*748 GALACIFOLIA—One of our most charming and delicate natives. Evergreen shiny leaves turning bronze in Fall, and pretty pinkish fringed bells in May. Strong plants only.

SILENE—Caryophyllaceae—Catchfly—Mixed soils.

750 Acaulis—Forms a compact spiny cushion of light green on which sit very tightly pretty little pink flowers in June.

752 Alpestris—A free bloomer and a good dwarf compact grower. Pure white.

754 Californicum—Fiery scarlet. Our stock is raised and grown in our Nursery and shouldn't be compared with the Western collected plants which seldom bloom.

756 Hookeri—A beautiful, heavenly plant when in bloom. Large soft pink flowers with carmine veins (same stock as above).

758 Maritima—Splendid grey foliage and carnation-like white flowers. Plant it in your walls. 

760 Maritia Rosea—A clear pink form of the above.

762 Shafta—A beautiful Fall bloomer. Rosy pink.

764 Virginica—The Native Fire Pink. Large vivid scarlet flowers—Blooms best in slightly acid soils.

SPRAGUEA—Portulaceae—Pussy-Paws—Dry sandy soil.

766 Umbellata—Odd looking little Westerner. Rosettes of grey green leaves, red stalks with round fluffy pink flower heads.

STACHYS—Labiatae—Woundwort—Ordinary soil.

768 Ciliata—Variegated foliage and delicate violet blue spikes of flowers.

SYNTHYRIS—Scrophulariaceae—Moist wood loam.

770 Rotundifolia—An early riser from the West, where it paints meadows and wood edges with a clear violet blue sheet of color. It blooms just as well here.

THYMUS—Labiatae—The Thymes—Ordinary soils.

772 Azoricus—The true form, a dainty shrubby species forming compact little bushes of light green foliage and rosy flowers.

774 Citriodorus—The lemon scented thyme.

*778 CITRIODORUS AUREUS—Gold and green form of the above. Strong plants.

780 Serpyllum Album—A minute ground cover of first class—covers itself with pure white flowers.

782 Serpyllum Coccineus—The red flowering form.

784 Serpyllum Lanuginosus—The woolly Thyme. A beautiful ground cover for contrast effect.

*786 SERPYLLUM COCCINEUS SPLENDENS—Larger flowering form of Coccineus—an improved variety.

*788 NITIDUS—A rare variety, with very fine greyish foliage and purple flowers.

TUNICA—Caryophyllaceae—Ordinary soils.

790 Saxifraga—One of the easiest and most graceful of all the Rock Plants. Forms airy cloud of pink flowers from Midsummer 'till late Fall.
*792 SAXIFRAGA NANA—A very dwarf and compact form. .......................... 1E 4”  50c  $4.50
*794 SAXIFRAGA FLORA PLENA—A double flowering kind. Rare and choice—Stock limited. ............. 1E  6”  $1.00

VACCINIUM—Ericaceae—Dwarf Mountain Cranberry. 
*796 VITIS-IDAEA—A tiny evergreen cranberry with box like leaves turning copper color in Fall and Winter. Pink Flowers and bright red berries. Blooms Spring and Summer. Strong plants. ..................... 4M 3” $1.00

VALERIANELLA—Valerianaceae—Ordinary soil.  
798 We have one charming species whose classification we are not sure of. It is very dwarf, forming a hummock of soft green leaves and pale pink flowers in June. Easy grower. .......................... 1M 3”  50c

VERONICA—Scrophulariaceae—Speedwell—Ordinary soil.
800 Allioni—A fine ground and rock cover. Beautiful blue flowers .................................................. 1E 3”  40c  3.50
802 Bellidifolia—Forms basal tufts of dark pointed leaves and short spikes of intense blue flowers. ........ 1E 6”  50c
804 Cassipitosa—a tiny little mite of woolly appearance. Makes nice ground cover for bulbs. ............. 1 3”  60c
806 Gentianoides—A specie with gentian-like leaves, glaucous and almost leathery. Pale blue spikes ..... 1 12”  35c  3.00
808 Incana—An indispensible variety for foliage contrast. Silver gray, with spikes of clear Royal Blue. Fine in wall ................................................................. 1E 12”  35c  3.00
810 Pectinata—A woolly leaved variety of good value as a ground cover. Azure Blue. .................. 1E 4”  50c  4.25
812 Prostrata—One of the best and easiest growers. Forms large mats, and covers itself with a profusion of celestial blue flowers. .......................................................... 1 4”  35c  3.00
814 Repens—One of the most endearing little gems. Hides itself in early Spring under a solid carpet of pale blue buds, opening white. Fine for paved walks. Strong clumps. ......................................................... 1 1”  35c  3.00
816 Rupestris Flexuosa—A very dwarf species. The leaves are dark and shiny, lying flat on the stems. Profuse bloomer. Blue ..................................................... 1 3”  40c  3.50
818 Rupestris Flexuosa Alba—The very rare white form of the above .................................................. 1 3”  50c
*820 RUPESTRIS FLEXUOSA NANA—A very dwarf and slow growing kind. Does not creep as prostrata, and remains always neat. Intense blue ...................... 1 3”  75c  5.00
822 Rupestris Flexuosa Rosea—Pink variety ................................. 1 3”  50c
*824 SAXATILIS—Forms compact little bushes of upright growth. Dark shiny evergreen foliage, and deep blue flowers ..................................................... 1 3”  75c  6.50
826 Teucrium Royal Blue—A beautiful species to lodge amongst large rocks. ........................................ 1 1”  50c
828 Teucrium Trehani—Trailing variety of golden foliage and blue flowers. Choice ............................... 1 1”  50c

VIOLA—Violaceae—Violet—Mixed soils.
830 Apricot—A rare shade among the Viola. A good grower and beautiful. ........................................ 1L 6”  30c  2.50
832 Arenaria—A rare European species with soft pink flower and fine small heart shaped leaves. ........ 1L 4”  50c
834 Blanda—A white flowering variety ........................................................................................................... 4L 4”  25c  2.00
836 Bosniaca—A beautiful deep rose violet from Central Europe. ......................................................... 1L 6”  50c
*838 GRACILIS—A true rock violet, beautiful shade of violet. Our stock is of pure Alpine strain—strong plants ................................................................. 1L 4”  50c
**840 Jersey Gem**—A beautiful Pansy Violet of royal purple, blooming profusely from late Spring to late Fall. Strong plants ........................................ 1 6’’ 50c $3.50

**842 Johnny-Jump-Up**—The wild Pansy Violet of Grandmother’s Garden. Blooms all year round. Comes in hundreds of different combination of colors ........ 1 6’’ 25c 2.00

**844 Lutea**—Gold colored variety ......... 1 6’’ 35c 3.00

**846 Florariensis**—Small blue violets. Plant blooms continuously ................ 1 6’’ 50c 3.50

**848 Haslemere**—Flowers of a delightful lilac pink. Steadfast bloomer. ......................... 1 4’’ 60c 4.25

**850 Odorata**—The true English fragrant violet ........ 4 4’’ 30c 2.50

**852 Pedata**—The Bird’s foot violet, large pale violet flowers .................. 4 4’’ 30c 2.50

**854 PEDATA BICOLOR**—Exquisite form of the above, with the two petals above Royal Purple, and the lower three a pale violet. 4 4’’ 35c 3.00

**856 Pubescens**—Our native yellow hairy violet .......... 4 10’’ 25c 2.00

**858 RIVINIANA**—A pale blue Alpine gem, will stand well in sunny and dry situations ................... 1-2 3’’ 75c

**WAHLengerGia**—Campanulaceae—Ordinary gritty soil. Does well in walls.

**860 Dalmatica**—A tufted Hare Bell from Greece, with violet flowers, gathered in a head spread flat on the ground like a star .................. 2E 3’’ 60c 4.00

**862 Graminifolia**—Same as above, with grass-like leaves and light blue flowers ........................................ 2E 4’’ 75c 6.25

**864 Kitaibeli**—Similar to Dalmatica with shorter leaves, slightly hairy along the edges ........................................ 2E 3’’ 75c

**866 Tasmanica**—A good growing kind with small pale green leaves and clear lavender blue flowers. Has underground runners and forms thick mats .......... 2EM 4’’ 75c

**SHRUBS - EVERGREENS AND CONIFERS**

We take a pardonable pride in our stock of conifers and evergreen shrubs. Not only are those varieties herein listed entirely suited for the Alpine or Rock Garden, but in addition—owing to their low stature—are more valuable than the taller sorts for plantings around the home grounds. They add that touch of vibrant pulsating life to the winter garden that is not only charming and delightful but also really essential.

Our stock is of the very highest quality, transplanted at least twice and often three or four times, thus ensuring that very healthy root condition which constitutes a prime necessity for all evergreens.

Prices—except where otherwise noted—include balling and burlapping. In other words they are shipped, so dug and wrapped, that a good sized ball of earth around the roots is included.

**ANDROMEDA**—Plant in wood loam soil in semi-shade. The Lily-of-the-Valley Bush.

1000 Catesbaei—Attractive white flowers in May followed by delightful coloring in the Autumn. Fine specimen plants. 15’’ .... Each $2.25

1002 Floribunda—Similar to the above but more floriferous and somewhat earlier in blooming. Fine specimen plants. 15’’ .... Each $3.25

**AZALEA**—Prefers wood loam soil, or other soil with humus.

1004 Amoena—The Japanese Azalea; purplish red flowers in abundance with fine contrasting foliage. A delight in late April.

Each 6’’ to 8’’........ $1.25 8’’ to 10’’........ $1.50 10’’ to 12’’........ $2.25

1006 Hinodegiri—The Red Japanese Azalea; flowers bright carmine-pink most effective in groups, fine companion to Amoena. Fine bloomer.

Each 6’’ to 8’’........ $1.30 8’’ to 10’’........ $1.75 10’’ to 12’’........ $2.50

**BIOTA**—Ordinary garden soil. Indifferent as to position.

1008 Orientalis Compacta—Siebold’s Arborvitae, fine brilliant green color, very neat and compact in growth. Fine specimen plants.

Each 12’’ .... $1.50 15’’ .... $2.00
1010 **Orientalis Compacta nana aurea**—Berchman’s Golden Arborvitae. A very fine slow grower most suitable for rock gardens, fine golden yellow foliage. A superb kind that we strongly recommend. Each 6” to 8”... $1.25
8” to 10”... $1.75 10” to 12”... $2.00 18”... $4.50

**BUXUS**—Ordinary garden soil. The Dwarf Box.
1012 **Suffruticosa**—The true Dwarf Box. A real little green gem for specimen planting in the rock garden, or for edgings to the formal plantings. Per ten bushes 4”... $3.25 6”... $6.00 8”... $10.00 10”... Each $1.50
Not balled or burlapped.

**COTONEASTER**—Ordinary garden soil. Fine spreading bushes.
1014 **Horizontalis Davidiana**—The Rockspray, low and slow growing, spreading dark green foliage with red berries in the Fall. Lovely. Each 12”... $1.25 15”... $1.75

1016 **Macrophylla**—The dwarf Rockspray, very small, very dark green ovate leaves and dwarfer than the preceding variety. Each 15”... $1.50 18”... $2.00

**CHAMAEDAPHNE**—Ordinary garden soil. The Leatherleaf.
1018 **Calyculata**—White flowers in April. This species holds its leaves throughout the Winter. Very useful and attractive. Each 15” to 18”... $1.75 18” to 24”... $2.25

**DAPHNE**—Ordinary garden soil, but the addition of humus is beneficial.
1020 **Cneorum**—The Garland Flower. An aristocrat of the evergreens. Narrow glossy leaves and fragrant bright pink flowers. Strong plants. Each... $2.50
1022 **Mezereum**—One of the charmers of the early Spring rock garden display with pinkish lilac blossoms. Flowers appear before the leaves. Not an evergreen but very delightful. A real gem. Pot grown plants only. Each... $1.25

**EUONYMOUS**—Ordinary loamy soil. The Baby Wintercreeper.
1024 **Radicans Minimus**—A charming tiny evergreen creeper, clinging to stones and making a fine cover. Each 15” to 18”... $1.25

**JUNIPERUS**—Ordinary soils. The Junipers.
1026 **Chinensis Sargentii**—Sargent’s Juniper. A most valuable evergreen ground cover and rock plant. Prostrate habit with fine green color. Each 12” to 15”... $3.50
1028 **Communis depressa**—Prostrate Juniper. Spreading branches, neat and very interesting in the rock garden. Each 18”... $2.50
1030 **Excelsa Stricta**—Spiny Greek Juniper. Compact pyramidal shape, gray-green foliage. Fine for accentuating or for contrasty effects. Each 12”... $2.25 18”... $5.00
1032 **Horizontalis Sabina Prostrata**—Savin’s Creeping Juniper. One of the neatest of the trailing Junipers, well adapted to rock garden. Each 15”... $2.00 18”... $2.75
1034 **Horizontalis Douglassi**—The Waukegan Juniper. Long trailing branches with steel-blue foliage and makes a most delightful contrast against rockwork. The very best of the Junipers. Fine winter color. Each 15”... $3.00 18”... $4.00
1036 **Japonica**—The Japanese Juniper, a low and slow grower and a most welcome and valuable addition to the well-stocked rock garden. Most beautiful green scaly leaves. Allogether a delight. Each 8” to 10”... $2.00
1038 **Sabina tamariscifolia**—The Tamarisk Juniper. Like the Waukegan Juniper this variety is one of the best of the species. It is a flat spreading kind with a very fine soft texture, choice. Each 12” to 15”... $2.50 15” to 18”... $3.25 18”... $5.00
1040 **Japonica aurea varigata**—The variegated golden Japanese Juniper. Fine for Japanese effects in the rock garden. A most delightful sort with golden tipped leaves, irregularly placed branches. Our stock is limited. Each 12”... $3.00
1042 **Virginalis globosa**—The Globe Japanese Juniper. Spherical-shaped thin round branches, very odd and in all ways very fine. Each 12”... $2.50 15”... $3.00 18”... $4.00

**LEIOPHYLLUM**—Sandy wood loam soil. Sun or shade. The Sand Myrtle.
1044 **Buxifolium**—Very fine shrub with pinkish white flowers, symmetrical and delightful spreading habit, small soft green leaves. Each 8” to 12”... $1.50

1046 **Prostratum**—The Alleghany Sand Myrtle, somewhat similar to the above but perhaps even more choice. Each 6” (spread)... $1.25
PICEA—Ordinary soil—The Spruces.

1048 Alba Albertiana—Dwarf Alberta Spruce. Very slow growing kind, compact and most desirable for small scale plantings. We have only a very limited stock of this rare little gem.

Each 10". . . . $5.25 12". . . . $6.50

1050 Excelsa Pumila—Dwarf Norway Spruce, a slow growing and very choice variety with deep green foliage. Most interesting and useful. Each 12". . . . $5.00

PINUS—Ordinary soil.

1052 Montana Mughus—The Mugho Pine. This variety forms a most attractive round topped bush and is equally suitable for rockery or for foundation plantings.

Each 15". . . . $4.00

RETINISPORA—Ordinary garden soil. The Cypresses.

1054 Ericoides—The Heather Cypress, this variety has leaves which resemble the heather and which gives it a very pleasing cloud-like effect.

Each 15". . . . $2.50 24". . . . $4.00

1056 Obtusa Gracilis—The Slender Hinoki Cypress, a variety for making a pyramid of a beautiful rich shade of green, a very slow grower, a gem.

Each 15". . . . $4.00 24". . . . $5.00

1058 Obtusa Gracilis Compacta—The compact Hinoki Cypress, similar to the above which might be termed the "vest pocket edition" of this very charming and delightful variety. Slow grower. Limited stock.

Each 12". . . . $3.50 18". . . . $5.00 24". . . . $6.50

1060 Obtusa Nana—The dwarf Hinoki Cypress. We quote a well-known author: "This tiny Hinoki Cypress is a most engaging pygmy with short deep green branchlets." Grows very slowly. Limited stock.

Each 10". . . . $3.00

Each 10". . . . $3.00

1064 Plumosa Lutescens—The Dwarf Yellow Plume Cypress. Forms a low round shaped bush with yellow tipped branches. Fine and interesting.

Each 15". . . . $3.50 18". . . . $5.00

RHODODENDRON—Acidy wood loam.

The ALPINE RHODODENDRONS. Lovely dwarf kinds. Very choice.

1066 Myrtifolium—A lovely little gem with soft red flowers and fine foliage, choice kind which seldom exceeds 24 inches in height. Grand.

Each 15" to 18". . . . $6.00 24". . . . $10.00

1068 Ovatum—A fine companion to the above with light pink blossoms and foliage of a lovely green color. It is similar to the above with a neat habit of growth. Rarer than the above type.

Each 15". . . . $5.00 15". . . . $7.50

1070 Wilsoni—A very pretty pearly pink color with foliage of the type, very A valuable dwarf evergreen for the rock garden.

Each 15". . . . $3.50 18". . . . $4.50 24". . . . $6.00

1072 Carolinianum—The Carolinan Rose Bay, lovely rose-purple flowers and of a very compact bushy growth, thriving best in moist shady places.

Each 12". . . . $2.50 15". . . . $4.00 18". . . . $5.50 24". . . . $10.00

1074 Carolinianum album—The white flowered variety. A fine companion to the above. Fine for massed plantings.

Each 12". . . . $2.50 15". . . . $4.00 18". . . . $5.50 24". . . . $10.00

1076 Catawbiense—The Catawba Rose Bay—Lovely large rosy purple blossoms with fine deep green leaves. Profuse bloomer. Thrives in half shade.

Each 24". . . . $3.00 30". . . . $4.00

1078 Minus (punctatum)—The Piedmont Rhododendron—Pale pink flowers, a very choice species and quite slow in growth. Fine foliage.

Each 15". . . . $5.00

TAXUS—Ordinary garden soil. The Yews.

1080 Baccata adpressa erecta—The Short Leaf English Yew. Delightful upright, neat habit with stiff green foliage crowded on the branches. Fine.

Each 10" to 12". . . . $2.00

1082 Baccata repandens—Spreading English Yew. A fine variety with spreading horizontal habit and lovely dark blue-green color. Most valuable and interesting.

Each 15". . . . $3.50 18". . . . $5.00 24". . . . $6.00

1084 Cuspidata brevifolia—Dwarf Japanese Yew. Broad thick leaves of very dark green color. The Arnold Arboretum states that this is the most valuable of all dwarf evergreens.

Each 12". . . . $4.00
THUJA—Ordinary garden soil. The Arborvitae.

1086 Occidentalis globosa—The Globe Arborvitae—Fine round shaped evergreens which may be put to many uses in every position in the rock garden.
Each 12".... $2.25 15".... $2.75

1088 Occidentalis Hoveyi—Hovey’s Arborvitae. A fine species with bright green foliage and oval in shape. Very symmetrical growth.
Each 15".... $2.50 18".... $3.00

In bringing to a close our little brochure on the conifers and evergreens we again remind you that our stock is carefully selected and each shipment that we make may be taken as a criterion of what well-grown and healthy evergreens should be and again we repeat that we take a pardonable pride in being able to ship such fine specimens.

“OUR BLUE RIBBON COLLECTION OF ROCK PLANTS AND DWARF EVERGREENS”

For the beginner who desires an assortment of easily grown Rock Plants suitable for his first venture into this delightful realm of alpine flora, we have made up a collection of desirables whose cultivation is simple and whose hardiness is beyond question. Indeed, we might call this collection the key stone of the rock garden.

ADDITIONAL VARIETIES OF ROCK PLANTS. Besides the many varieties of plants listed herein, we have on hand limited quantities of other rare and very charming kinds of rock plants and we solicit inquiries for any not listed. Remember we are devoting our energies exclusively to the growing and cultivation of Alpines and periodically receive plants and seeds from the leading American and European collectors of the rare and unusual kinds.

A SUITABLE GIFT FOR CHRISTMAS, BIRTHDAY, OR ANY OCCASION

We have organized a gift department for the benefit of our Patrons. Nothing will please those that are dear to you and have a Garden more than a gift of plants to remember you by.

You tell us the amount you care to spend, and we will inform the recipients of the gift that a credit of so much for plants or bulbs, or anything contained in our catalogs, is open to them through your courtesy. At the proper shipping time, we send you bill for plants ordered. Of course, our catalogs are mailed as soon as you give us your friend’s name and address for their selection.
People in general think that a wall must be made of cut stones, held together with mortar. You have then a very ordinary wall, a plain wall—a dead wall. If you have a wall to build and you want a beautiful living wall, build it according to the sketch, slanting each stone toward the center, and instead of using cement, use a compost made of one-third sandy loam and two-thirds leaf mold, one handful of sheep manure or bone meal to each pail of compost. Use dry and fill spaces between stones as you would concrete. The dimensions given for width are minimum sizes, and wall may be made thicker if wanted. The thicker, the better. A slant of two inches to a foot is enough to catch rain. Use rough flat stones if possible—sand stone is best medium, as it retains moisture longer.

FLOWERY PATHS

Why let grass and weeds grow in your stone path, or why build a concrete path in your garden? A beautiful and out of the ordinary walk is made of stepping stones planted with low and dwarf compact little gems tracing, with delightful foliage and flowers, the crazy lines and zigzags your fancy has designed.

First, make a shallow trench the length and width of your path, from 8” to 10” deep. Fill and pack bottom with four inches of coarse gravel, broken stones or cinders. The balance should consist of good rich compots from your heap, or made of one-third loam and two-thirds leaf mold. Press your stepping stones into it, making any design you wish. Water thoroughly to set stones firmly, then plant.
